

webwatch

In this issue, Webwatch covers websites on the subject of the local private sector provision of water, sanitation and waste

Private Sector and CBO Participation in Human Waste Issues

This IRC project shows how the small-scale private sector and CBOs effectively contribute to scaling up human excreta handling in rural and small town communities.

<http://www.gtz.de/ecosan/download/irc-factsheet.pdf>

WSUP: Water and Sanitation for the Urban Poor
Working in poor urban areas, WSUP brings together local and global expertise to provide sustainable water and sanitation solutions for poor communities. The private sector contributes technical and managerial expertise, including design and project management.

The Role of Small Scale Private Water Providers in Serving the Poor

This ADB study gathered and analysed information about the types of services small-scale

private water providers (SSPWPs) provide, their profiles, their constraints and potentials.

WELL Briefing Notes:

Several WELL Briefing Notes are available on the topic at <http://www.lboro.ac.uk/well/resources/Publications/WELL%20Briefing%20Notes.htm>, including:

Briefing Note 33: Private Sector Participation in urban water supply

It assesses the evidence for the effectiveness of PSP in improving affordable access to water and sanitation for the poor in developing countries.

Briefing Note 16.1: Local financing mechanisms for water supply in Kenya

This Country Note identifies the key financing mechanisms for supporting water services in Kenya.

Briefing Note 32: SSIPs: a role in sustaining sanitation services to the urban poor

This identifies the significance and role of Small Scale
