

webwatch

In this issue Webwatch covers integrated water resources management sites.

IWRM NET

IWRM-NET is a European Research Area Network project (ERA-Net) funded by the European Commission from 2006 to 2010. It aims to implement **new research activities** at the **national and regional** levels related to IWRM with a focus on the Water Framework Directive. <http://www.iwrm-net.org/>

IWRM.ORG

IWRM.ORG aims to provide a valuable service to those civil society and public stakeholder sectors interested in learning more about the benefits, principles and practices of an integrated approach to water resources management. <http://www.iwrm.org/>

GWP ToolBox on Integrated Water Resources Management

The ToolBox is a free and open database with a library of case studies and references that can be used by anyone who is interested in implementing better approaches for the management of water on a local, national, regional or global level. <http://www.gwptoolbox.org/>

Capacity Building for IWRM

Together with partner networks, APFM/WMO and UNESCO-IHE, Cap-Net is engaged in addressing capacity building in

adaptation to climate change in the context of IWRM. Cap-Net resources include a tutorial on IWRM, links to networking activities and IWRM programmes, and draft indicators for measuring progress.

<http://www.cap-net.org/>

Gender and IWRM Resource Guide

The resource guide on gender and IWRM is meant as a reference document to assist water and gender practitioners and professionals as well as persons responsible for gender mainstreaming, and anybody else who is interested in the water sector. It is a reference guide that should be used in conjunction with the texts and materials to which it refers.

IWRM: Empowers Thematic Group

The EMPOWERS Thematic Group's overall objective is to improve long-term access and rights to water by vulnerable groups in local communities through a process of participatory water governance. The website provides a collection of documents, papers and studies which provide a valuable introduction to the critical issues in the field of IWRM.
