THE NEW MONOLIFT® DW90 HANDPUMP

Sustainable Borehole Water Supply for Remote and Rural Communities

The new DW90 Monolift hand pump has been developed from 30 years field experience in the harshest of environments with considerable input and co-operation from major NGO's and Aid Organisations.

The DW90 is born of a pedigree of well over half a million deep well and surface Mono water pump installations.

One of the key criteria in selecting borehole pumps for village water supply should surely be reliability.

Village water supply pumps once installed become a focal point in the village with an ever increasing dependency and reliance put on the pump by the community which it serves. A pump which is always prone to breakdowns serves no-one effectively.

One pump principle that has won World Recognition for reliability under the most arduous of duties is that of the progressing cavity or p.c. pump system. Correctly engineered and applied this pumping system can run one, two, or even three decades without the need for maintenance. All the substantial performance and technical benefits of p.c. pumps for the same price as a reciprocating pump.

Mono Pumps

DRESSER

diary

27 November-1 December 1995. **Agri Africa '95, Accra, Ghana.** Exhibition, accompanied by conference on Postharvest Technology and Commodity Marketing. For further information contact: *Tracey Nolan, Water Africa Ltd., 37 Upper Duke Street, Liverpool L1 9DY, UK. Tel: +44 151 709 9192. Fax: +44 151 709 7801.*

23-8 June 1996. **Water Quality International '96, Singapore.** International forum on water-pollution control. Overview of water research and technology, environmental issues, and waste management. Further details from: *Jenny Ong. Tel: +65 272 2250. Fax: +65 272 6744.*

24-6 June 1996. **Aquatech Asia 96, Singapore.** Platform for commercial and academic organizations to explore new business opportunities in the emerging Asian markets. For more details, see above.

2-5 July 1996. **Water Africa '96, Accra, Ghana.** Fourth in a series of exhibitions of water and environmental protection technology and services. For further information contact: *Howard McKiernan, Water Africa Ltd., 37 Upper Duke Street, Liverpool L1 9DY, UK. +44 151 709 9192. Fax: +44 151 709 7801.*

14-17 July 1996. **Annual Symposium of American Water Resources Association, New York, USA.** Focus on restoration and maintenance of lost or impaired watershed, stream, or wetland hydrologic and/or water-resource-quality functions. Send abstracts, plus name, affiliation, address, phone, fax, and e-mail number to: *Dr Jeffrey J. McDonnell, SUNY College of Environmental Science and Forestry, 1 Forestry Drive, Syracuse, NY 13210-2779, USA. Fax: +1 315 470 6956.*

9-13 September 1996. **22nd WEDC Conference: Reaching the unreached - challenges for the 21st century, New Delhi, India.** Those involved in interesting projects and programmes in, or for, developing countries, are invited to prepare papers. Abstracts should reach the co-organizers not later than **31 January 1996**. NB Women authors particularly sought. Offers from authors in India to: *Professor K.J. Nath, IPHE Building, CK-58, Salt Lake, Calcutta 700 091, India. Fax: +91 33 373852.* Offers from other countries to: *Professor John Pickford, WEDC, Loughborough University of Technology, Leics. LE11 3TU, UK. Fax: +44 1509 211079.*

23-7 September 1996. **Aquatech 96, Amsterdam, The Netherlands.** International trade fair and conference programme. Covers drinking-water, process water and wastewater technology. Information from: *Ingrid Looijmans or Hennie Taconis. Tel: +31 20 5491212.*

3-6 November 1996. **International Evaporation and Irrigation Scheduling Conference, Texas, USA.** Focusing on new technology, prioritizing future needs. For researchers, consultants, designers, practitioners and manufacturers. Further information from: *Susan Buntjer. Tel: +1 616 4290300. Fax: +1 616 4293852.*
