ISSN: 1756-3488 (online)

0262-8104 (print)

Published quarterly

Food Chain journal encourages critical thinking on how food systems can be more productive and sustainable, with concrete implications for designing, implementing, and evaluating development programming. It is essential reading for practitioners, researchers, donors, policymakers, engaged in activities directed at smallholders and poor consumers in the global South.

The coverage includes but is not restricted to: Agri-food systems; Rural livelihoods; Food security; Post-harvest management; Agro-ecology; Certification; Seed systems; Food processing; Consumer preferences.

Contributions to *Food Chain* may include:

- Research article: original development-relevant research, peer-reviewed, up to 8000 words
- Perspectives from the field: ideas and experiences on entrepreneurship in developing countries, peer-reviewed, up to 4000 words
- Editorial: reflections on the state of market-oriented research and development practice

For full instructions for authors, including Open  Access details, visit bit.ly/FoodChainJournal

Articles are submitted via *Food Chain* online submission and peer review system
