

WATERLINES

An international journal of water,
sanitation and waste

ISSN: 1756-3488 (online)
0262-8104 (print)
Published quarterly

Waterlines promotes debate and highlights the latest perspectives in the WASH sector. The journal considers the key challenges facing engineers, health professionals, community development workers, researchers, policy makers—and suggests how these issues may be tackled using affordable, sustainable systems with reference to wider policy and institutional frameworks.

Waterlines contains full-length peer-reviewed papers and shorter ‘articles from the field’.

Articles should be original contributions, between 4-6000 words in length, formatted to house style and not under consideration elsewhere. Alongside regular issues, *Waterlines* also produces special guest edited thematic issues.

Full instructions for authors can be found online at bit.ly/WATERLINESjournal

Articles should be submitted via *Waterlines* online submission and peer review system www.edmgr.com/waterlines

Editorial Board

Editors

Richard Carter – Independent consultant, UK
Leslie Morris-Iveson – Independent consultant, UK

Editorial Committee

Dotun Adekile – Independent consultant, Nigeria
Cara Flowers – Independent consultant, UK
Leslie Morris-Iveson – Independent consultant, UK

Editorial Advisory Board

Dani Barrington – University of Western Australia
Andy Bastable – Oxfam, UK
Ned Breslin – Tennyson Center for Children, USA
Clarissa Brocklehurst – Independent consultant, Canada
Joe Brown – Chapel Hill North Carolina, USA
Katrina Charles – Oxford University, UK
Frances Cleaver – University of Sheffield, UK
Kerstin Danert – Ask for Water GmbH, Switzerland
Caetano Dorea – Université Laval, Canada
Barbara Evans – University of Leeds, UK

Samuel Godfrey – UNICEF, Nairobi
Guy Howard – University of Bristol, UK
Andrés Hueso – WaterAid, UK
Alejandro Jimenez – Stockholm International Water Institute, Sweden
Rick Johnston – WHO, Geneva
Oliver Jones – Bluechain Consulting, UK
Stephen Jones – Dept for International Development, UK
Daniele Lantagne – Tufts University, USA
Patrick Moriarty – IRC, Netherlands
Guy Norman – Urban Research Ltd, UK
Jonathan Parkinson – IMC Worldwide, UK
Eduardo Perez – Global Communities, USA
Jan Willem Rosenboom, – Bill & Melinda Gates Foundation, USA
Darren Saywell, DAI Inc, USA
Marielle Snel – Save The Children, Jordan
Sally Sutton – Independent consultant, UK

Waterlines priority areas

Planning and resourcing WASH services

1. How to strengthen and provide sufficient human and financial resources to local governments to enable them to support WASH services in their jurisdictions - especially in countries with small tax bases and limited fiscal decentralisation
2. How to raise the political priority of WASH to get it on a par with health, education, roads and energy – what arguments need to be made, to whom, and how? Is evidence enough to influence political change
3. And how to get clear and committed agreement on who should invest in what aspects of WASH – Capex, Opex, Capmanex and direct and indirect support costs?

New development paradigms and WASH

4. How can truly hygienic environments and behaviours be achieved, and what does ‘one-health’ (human animal-environmental interactions) mean for practices and policies?
5. How can we deliver WASH that is climate resilient – what does this mean in practice, and how can practitioners integrate climate resilient strategies into their work?

In addition to these areas, we continue to accept papers from across the full spectrum of water supply, sanitation (including waste management) and hygiene issues that are of relevance to practitioners and researchers focused on low- and middle-income countries.

We also now accept papers in two formats including full research papers and shorter practice papers. More details are available on the website:

We are proud to announce that *Waterlines* journal is now Open Access, through a Subscribe to Open (S2O) model. All articles published from January 2022 are free for everyone to read and download.

We are delighted to be part of this exciting movement across the publishing landscape towards the opening of content, particularly for authors and readers working in limited-resource contexts. Find out more: practicalactionpublishing.com/subscribe-to-open
